MEDICAL CORPSMAN ASSAULT PACK

Assembly of the Medical Corpsman Assault Pack (CAP), or "Medbags", for the U.S. Marine Corps (USMC) continues at ServiceSource's Employment Center in Alexandria, VA. Over 12, 000 MOLLE bags have been delivered to field medical corpsman and other military personnel to treat combat casualties.

Corpsman Assault Packs are proudly hand-packaged by employees with disabilities at ServiceSource.

In 2007, the Family of Field Medical Equipment Personnel (FFME) of the Marine Corps System Command (MARCORSYSCOM) finalized the content assemblage (CAPCA) to go into the new design digital camouflage Corpsman Assault Pack (CAP).

The CAPCA represents the latest in combat casualty treatment available. The CAPCA also includes two smaller packs for patrol usage.

ServiceSource is proud to be the AbilityOne Program (formerly JWOD) chosen to be the integrator of this new pack and the components and field them to the USMC.

The CAP contains 125 pieces and weighs just 35 pounds when fully loaded.

The NSN # 6545-01-549-1053 includes the CAP and all of the components (CAPCA) and has been approved by the Committee for Purchase from People Who Are Blind or Severely Disabled (CPBOSH) with ServiceSource the integrator. Replacement CAPCA's (including the CAP) can be ordered through ServiceSource.

Replacement components only (no pack) has been approved by CPBOSH with The Ability One/NISH NSN # 8465-00-NSH-0084, a permanent NSN is pending. It will not appear in the Fed Log until a final NSN number is issued.

To order the Corpsman Assault Pack please contact:

John Baker or **Marcella Mowdy** at ServiceSource
